EDUCATION BACKGROUND

Zhejiang University

August 2023 - Present

Bachelor of Engineering in Electrical and Computer Engineering

GPA: 3.75/4.0

Honor: Third Class Scholarship of Zhejiang University; Academic Pioneer of Zhejiang University

University of Illinois Urbana-Champaign

August 2023 - Present

Bachelor of Science in Electrical Engineering

GPA: 3.8/4.0

RESEARCH EXPERIENCE

Large Language Modeling Fairness Decision Making | Undergraduate Researcher

April 2024 - June 2025

Adviser: Prof. Zuozhu Liu, ZJU

- Performed fairness testing for large language models using bias-information datasets, and explored dataset structures for quantifying fairness-related model outputs.

Neuro-Knowledge Factory for AI Agents | Undergraduate Researcher

March 2026 - Present

Adviser: Prof. Yang Yang, ZJU

- Built an agent-oriented neuroscience and BCI knowledge factory for downstream AI-agent use, processing 15K+ papers from PDF/API sources into standardized Markdown records and structured research cases.
- Organized research cases into contribution profiles, grouping profiles, working patterns, working knowledge, and agent-facing knowledge packages to support retrieval and reasoning in agent workflows.
- Developed quality-control workflows for metadata validation, duplicate checking, source-PDF alignment, and incremental updates to improve reliability of agent context.

EXTRACURRICULAR ACTIVITY

Vice-chairperson of the Yuehai Instrumental Music Club

August 2023 - Present

- Helped organize the International Campus Grassland Music Festival and participated in the 'Milky Island' Band, with over 10 major performances.

COURSE PROJECTS

Waste Image Classification (Fine-grained + 4 Bin-level), CS441

December 2025

- Built an image-based waste sorting assistant that classifies uploaded waste photos and recommends one of four disposal bins, reducing everyday sorting errors through quick visual guidance.

RiscvOS (Operating System Design), ECE391

October 2025 - December 2025

- Built a teaching operating system with file system, virtual memory, system call handling, pipe, shell, scheduler, and support for games including Trek, Zork, and Rogue.
